

Improving the Effectiveness and Safety of Cell Reprogramming in Brain Regeneration

REGENERAR is a Horizon Europe project focused on developing a non-viral formulation to reprogram certain brain cells into functional neurons

Project outcomes

- ✱ Development of a non-viral formulation for brain cell reprogramming
- ✱ Proof-of-concept demonstration of brain cell reprogramming both *in vitro* and *in vivo*
- ✱ Advancement of knowledge and education in cellular reprogramming

Facts about the project

2,943,233.00
Total Budget

48 months
Project duration

1st March 2024
Start Date
